

Professional Grade Fertigation™

Golf

G700

Water Driven
Constant rate
Up to 12 gal/hr

Application

Connect directly to pump station discharge line and inject fertilizer wetting agents, micros, or organic products

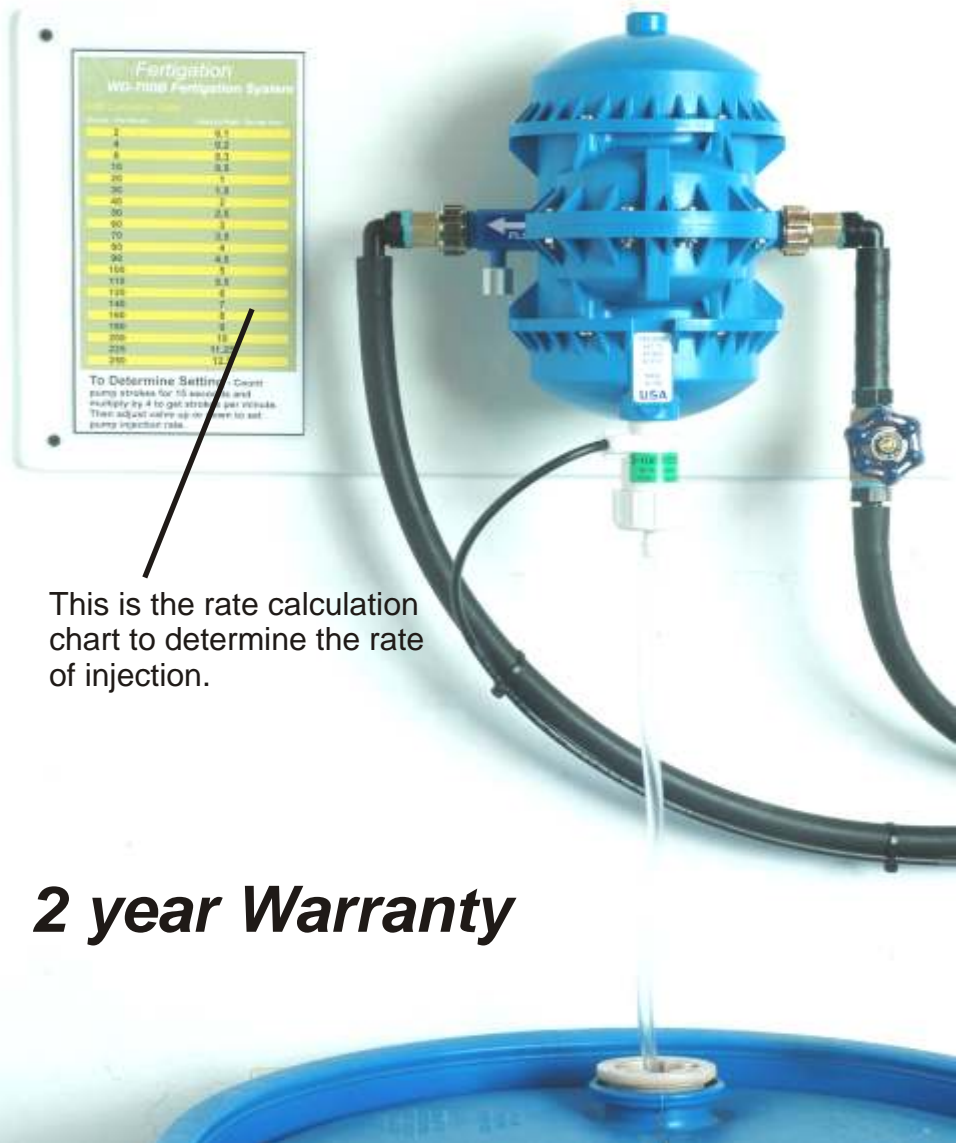

Area coverage

Greens, Tees, or the entire golf course

Simple Service

Fertilizer pump head is replaced by just turning and pulling out, for easy service.

This is the rate calculation chart to determine the rate of injection.

2 year Warranty

Finally, a Very Low Cost Golf Fertigation System

This water driven fertigation system can fertigate a golf course up to 100 acres. It is water driven, and can inject up to 12 gal per hour of fertilizer, wetting agents, or organic products. It is a constant rate injector that can be adjusted from one quart per hour up to the 12 gal /hr maximum, which means it can inject up to 120 gal in one ten hour irrigation cycle.

Finally, a low cost injector that can accurately fertigate products directly out of a drum, mini-bulk, or a tank.
